

# Simufact.forming Release 8.1

## Important information on licensing for the upgrade from Simufact.forming 8.0 to Simufact.forming 8.1

Dear customer,

**Please consider the following advice before installing Simufact.forming 8.1 to your hardware!**

Together with the new release Simufact.forming 8.1, which is on the delivered DVD, you will receive a license file (license.dat) via email. This license file is valid for one year and will be extended by Simufact Engineering GmbH automatically.

Basically, you have two possibilities for installing Simufact.forming 8.1:

### 1. Install version 8.1 and replace 8.0

- Advantage: less disk space needed, only one program version
- Clear structure, no confusion
- Version 8.0 is uninstalled, Version 8.1 is installed.
- License server 8.1 is installed and runs with the new 8.1 license received via email.

### 2. Running version 8.1 along with 8.0

- Convenient for the transition period.
- Current projects can be finished in version 8.0.
- Version 8.1 is being installed in parallel to existing version 8.0 to a new directory structure (default setting).
- **Both versions run with the license server 8.1.** The new 8.1 license file and the existing 8.0 license file have to be imported both.
- A **solver license** can only be used **either with** version 8.1 **or** version 8.0. No double amount of solver licenses is available!  
Thus you may **only** use the **solver** of version **8.0 or** version **8.1**.
- The 8.0 version can thus be used as an alternative to version 8.1 until the expiration date of the current 8.0 license key.
- If the current 8.0 license key expires before October 31, 2008, Simufact will provide an extended 8.0 license key on request.
- Thus, Simufact guarantees for at least a 3-month transition period

If you have any questions about the installation, please contact our support hotline:
