Simufact on one Page

Simufact Engineering GmbH

Simufact.forming is one of the leading software packages to simulate forming processes. More than 14 years of experience, founded by two metal forming specialists, based on the best solver technology available on the market, world wide business partners.

Who

- Hot Forging
- Cold Forming
- Rolling
- Ring Rolling
- Cogging
- Spinning
- Extrusion
- Joining
- Welding

What

Simulate forming process, material properties, forming characteristics, kinematics, temperature, die load
process optimization

Where

Shop floor due to very easy to use graphical user interface
Design and research departments because of unlimited functionalities for advanced users (incl. programming)

Why

- Cost reduction for process design -50%
- Less flash material -10% to -30%
- Reduced scrap -15%
- New Markets > +10%

Pay back period < 1 year
